(c) **Expiry Date**

Each Option will expire at 5:00 pm (AEST) on or before 31 March 2020 (**Expiry Date**). An Option not exercised before the Expiry Date will automatically lapse on the Expiry Date.

(d) **Exercise Period**

The Options are exercisable at any time on or prior to the Expiry Date (**Exercise Period**).

(e) **Notice of Exercise**

The Options may be exercised during the Exercise Period by notice in writing to the Company in the manner specified on the Option certificate (**Notice of Exercise**) and payment of the Exercise Price for each Option being exercised in Australian currency by electronic funds transfer or other means of payment acceptable to the Company.

(f) **Exercise Date**

A Notice of Exercise is only effective on and from the later of the date of receipt of the Notice of Exercise and the date of receipt of the payment of the Exercise Price for each Option being exercised in cleared funds (**Exercise Date**).

(g) **Timing of issue of Shares on exercise**

Within 15 Business Days after the Exercise Date, the Company will:

- (i) issue the number of Shares required under these terms and conditions in respect of the number of Options specified in the Notice of Exercise and for which cleared funds have been received by the Company;
- (ii) if required, give ASX a notice that complies with section 708A(5)I of the Corporations Act, or, if the Company is unable to issue such a notice, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares does not require disclosure to investors; and

- (iii) if admitted to the official list of ASX at the time, apply for official quotation on ASX of Shares issued pursuant to the exercise of the Options.

If a notice delivered under (g) and (g)(ii) for any reason is not effective to ensure that an offer for sale of the Shares does not require disclosure to investors, the Company must, no later than 20 Business Days after becoming aware of such notice being ineffective, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares does not require disclosure to investors.

(h) **Shares issued on exercise**

Shares issued on exercise of the Options rank equally with the then issued shares of the Company.

(i) **Reconstruction of capital**

If at any time the issued capital of the Company is reconstructed, all rights of an Optionholder are to be changed in a manner consistent with the Corporations Act and the ASX Listing Rules at the time of the reconstruction.

(j) **Participation in new issues**

There are no participation rights or entitlements inherent in the Options and holders will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the Options without exercising the Options.

(k) **Change in exercise price**

An Option does not confer the right to a change in Exercise Price or a change in the number of underlying securities over which the Option can be exercised.

(l) **Transferability**

The Options are transferable subject to any restriction or escrow arrangements imposed by ASX or under applicable Australian securities laws.

5.2 Shares

The following is a summary of the more significant rights and liabilities attaching to Shares being offered pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) **General meetings**

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may also request or call and arrange to hold general meetings in accordance with the procedures and requirements in the Corporations Act.

(b) **Voting rights**

Subject to the Constitution and any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has:
 - (A) for each fully paid Share held by the Shareholder, one vote; and
 - (B) for each partly paid Share held by the Member, a fraction of a vote equivalent to the proportion which the amount paid (not credited) is of the total amounts paid and payable, whether or not called (excluding amounts credited), on the Share. An amount paid on a Share in advance of a call is not taken as paid.

(c) **Dividend rights**

The Directors may by resolution either:

- (i) declare a dividend and may fix the amount, the time for and method of payment; or
- (ii) determine a dividend is payable and fix the amount and the time for and method of payment.

If the Directors determine that a dividend is payable, they may, if permitted by the ASX Listing Rules, amend or revoke the resolution to pay the dividend before the record date notified to ASX for determining entitlements to that dividend.

Interest is not payable by the Company on a dividend

The Directors may set aside out of the profits of the Company such amounts by way of reserves as they think appropriate before declaring a dividend or determining to pay a dividend. The Directors may apply the reserves for any purpose for which profits may be properly applied. Pending any application of the reserves, the Directors may invest or use

For personal use only

the reserves in the business of the Company or in other investments as they think fit. The Directors may carry forward any undistributed profits without transferring them to a reserve.

Subject to the rights of persons (if any) entitled to Shares with special rights as to dividends, all fully paid Shares on which a dividend is declared or paid, are entitled to participate in that dividend equally, and each partly paid Share is entitled to a fraction of the dividend declared or paid on a fully paid Share of the same class, equivalent to the portion which the amount paid (not credited) on the Share bears to the total amounts paid and payable, whether or not called, (excluding amounts credited) on the Share. An amount paid on a Share in advance of a call is not to be taken as paid.

Unless otherwise determined by the Directors, Shares rank for dividends from their date of allotment.

The holder of restricted securities is not entitled to any dividend in respect to those restricted securities.

The Directors may resolve that a dividend (interim or final) will be paid wholly or partly by the transfer or distribution of specific assets, including fully paid shares in, or debentures of, any other corporation.

The Directors may establish a plan under which Shareholders or any class of Shareholders may elect to reinvest cash dividends paid by the Company by Subscribing for Shares.

The Directors may resolve, in respect of any dividend which it is proposed to pay on any Shares, that holders of those Shares may elect to forego their right to share in the proposed dividend or part of the proposed dividend and instead receive an issue of Shares credited as fully paid.

The Directors may resolve to capitalise any sum being the Company's profits or any reserve available for distribution to Shareholders and that no Shares be issued and no amounts unpaid on Shares be paid up on capitalisation of the sum or the sum be applied in accordance with the Constitution for the benefit of the Shareholders in the proportions in which the members would have been entitled if the sum had been distributed by way of Dividend.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind all or any of the Company's assets and for that purpose, determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest all or any of the Company's assets in a trustee on trusts determined by the liquidator for the benefit of the contributories.

(e) **Shareholder liability**

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become

liable for forfeiture.

(f) **Transfer of shares**

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of Securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) **Variation of rights**

The rights attached to any class of Shares may be varied in accordance with the Corporations Act. Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(i) **Alteration of constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

6. RISK FACTORS

6.1 Introduction

The Securities offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Securities.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

6.2 Company specific

(a) Going concern risk

While completing the review of the Company's half year, 31 December 2017 financial report, the Company's auditor, Grant Thornton Audit Pty Ltd, noted the following:

"We draw attention to Note 10 in the financial report, which indicates that the Group incurred net operating cash outflows of \$743,329 during the half year ended 31 December 2017 and, as of that date, the Group's had a closing cash balance of \$38,571. As stated in Note 10, these events or conditions, along with other matters as set forth in Note 10, indicate that a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern. Our conclusion is not modified in respect of this matter."

Notwithstanding the 'going concern' paragraph included in the financial report, the Directors believe the recent placement of \$2,000,000 will provide sufficient funds to adequately meet the Company's current expenditure commitments and short term working capital requirements. The Directors also believe the Company has demonstrated the ability to raise capital through equity markets if the Company requires further funding to meet the medium to long term working capital costs of the Company.

(b) Loss of land holding

The Company does not expect to retain all of its current land holding. Given the current economic conditions, the Company intends to primarily concentrate its exploration on its 100% owned Pathfinder Project in Colorado and Kentucky project as a non-core property as it is of the opinion that this will provide the quickest returns on its capital.

(c) Funding

The Company's ability to effectively implement its business and operations plans in the future, to take advantage of opportunities for

acquisitions, joint ventures or other business opportunities and to meet any unanticipated liabilities or expenses which the Company may incur may depend in part on its ability to raise additional funds. The Company may seek to raise further funds through equity or debt financing, joint ventures, production sharing arrangements or other means. Failure to obtain sufficient financing for the Company's activities and future projects may result in delay and indefinite postponement of exploration, development or production on the Company's properties or even loss of a property interest. There can be no assurance that additional finance will be available when needed or, if available, the terms of the financing might not be favourable to the Company and might involve substantial dilution to Shareholders.

Further, the Company, in the ordinary course of its operations and developments, is required to issue financial assurances, particularly insurances and bond/bank guarantee instruments to secure statutory and environmental performance undertakings and commercial arrangements. The Company's ability to provide such assurances is subject to external financial and credit market assessments, and its own financial position.

Loan agreements and other financing rearrangements such as debt facilities, convertible note issue and finance leases (and any related guarantee and security) that may be entered into by the Company may contain covenants, undertakings and other provisions which, if breached, may entitle lenders to accelerate repayment of loans and there is no assurance that the Company would be able to repay such loans in the event of an acceleration. Enforcement of any security granted by the Company or default under a finance lease could also result in the loss of assets.

The Company is exposed to risks associated with its financial instruments (consisting of cash, receivables, accounts payable and accrued liabilities due to third parties from time to time). This includes the risk that a third party to a financial instrument fails to meet its contractual obligations; the risk that the Company will not be able to meet its financial obligations as they fall due; and the risk that market prices may vary which will affect the Company's income.

(d) **Contractual Risk**

The Company's ability to efficiently conduct its operations in a number of respects depends upon a number of contracts. As in any contractual relationship, the ability for the Company to ultimately receive the benefit of the contract is dependent upon the relevant third party complying with its contractual obligations. To the extent that such third parties default in their obligations, it may be necessary for the Company to enforce its rights under any of the contracts and pursue legal action. Such legal action may be costly and no guarantee can be given by the Company that a legal remedy will ultimately be granted on appropriate terms.

6.3 Industry Specific

(a) **Oil & Gas Exploration**

The prospects in which the Company has an interest are at various stages of pre-exploration due diligence, exploration or production, and

potential investors should understand that exploration and development are high-risk undertakings.

Oil and gas exploration is a high risk, speculative activity that requires a large amount of expenditure over extended periods of time. There is no guarantee that exploration will result in commercial discoveries.

Technical conclusions during exploration, appraisal and production are subject to the uncertainties associated with all sampling techniques and to the risk of incorrect interpretation of geological, geophysical, drilling and other data.

By its nature, the business of oil and gas exploration contains elements of significant risk with no guarantee of success. Ultimate and continuous exploration success is dependent on many factors such as:

- (i) access to adequate capital;
- (ii) the design and construction of efficient exploration programs and expenditure budgets;
- (iii) securing and maintaining title to interests including maintaining lease obligations;
- (iv) cost overruns in drilling and other equipment failure, such as wear and tear;
- (v) obtaining consents and approvals necessary for the conduct of oil and gas exploration; and
- (vi) access to competent exploration and operational management and prudent financial administration, including the availability and reliability of appropriately skilled and experienced employees, contractors and consultants.

Adverse weather conditions over a prolonged period can adversely affect exploration and development operations and the timing of revenues

(b) **Commercialisation**

Even if the Company recovers potentially commercial quantities of oil and gas, there is no guarantee that the Company will be able to successfully transport the oil and gas to commercially viable markets or sell the oil and gas to customers to achieve a commercial return.

(c) **Oil and gas reserves and commercial law**

Oil and gas reserves are expressions of judgment based on knowledge, experience and industry practice. Estimates, which were valid when originally calculated, may change significantly when new information or techniques becomes available. In addition, by their nature, oil and gas reserves are imprecise and depend to some extent on interpretations which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and commercial flow plans which may, in turn, either benefit or adversely affect the Company's operations.

(d) **Operations**

The operations of the Company may be affected by various factors, including failure to locate or identify oil and gas reserves, failure to achieve predicted well production flow rates, operational and technical difficulties encountered in production, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated reservoir problems which may affect field production performance, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or production of the Pathfinder and Kentucky Prospects.

(e) **Production risk**

There is a risk that aggregate production from resources will not meet expectations and may decline beyond estimates. Disruption to or any reduction in the expected production of the Company's oil and gas related investments may result in variations to the Company's expected revenue and could have an adverse effect on the Company's financial performance and ongoing operations.

(f) **Oil and gas volatility and exchange rates**

If the Company achieves success leading to oil and gas production, the revenue it will derive through the sale of oil and gas exposes the potential income of the Company to oil and gas price and exchange rate risks. Oil and gas prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations, technological advancements, forward selling activities and other macro-economic factors.

Furthermore, international prices of oil and gas are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

(g) **Environmental**

The operations and proposed activities of the Company will be subject to US laws and regulations concerning the environment. As with most exploration projects and production operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or field development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws. Nevertheless, there are certain risks inherent in the Company's activities such as accidental leakages or spills, or other unforeseen circumstances which could subject the Company to extensive liability.

(h) **Sovereign**

The Company's projects outside Australia are subject to the risks associated in operating in a foreign country. These risks may include economic, social or political instability or change, hyperinflation, currency non-convertibility or instability and changes of law affecting foreign ownership, government participation, taxation, working conditions, rates of exchange, exchange control, exploration licensing, export duties, repatriation of income or return of capital, environmental protection, labour relations as well as government control over natural resources or government regulations that require the employment of local staff or contractors or require other benefits to be provided to local residents.

Any future material adverse changes in government policies or legislation in foreign jurisdictions in which the Company has projects that affect foreign ownership, exploration, development or activities of companies involved in oil and gas exploration and production, may affect the viability and profitability of the Company.

(i) **Title**

The system for obtaining development rights to oil and gas leases in Colorado and Kentucky can be complex given that numerous parties may hold the undivided mineral estate to a particular tract of land. Securing the leases to those mineral estates often requires lengthy negotiation with the various parties.

In order to independently verify that the parties with whom a company is dealing are the correct and sole holders of the mineral estate and to analyse the full rights and restrictions applying to the interest held by those parties requires that a company obtain detailed title opinions from appropriately qualified and experienced lawyers in Colorado and Kentucky. This can be a lengthy and expensive process and the final opinions are often the subject of numerous qualifications and requirements.

6.4 General risks

(a) **Economic**

General economic conditions, introduction of tax reform, new legislation, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

(b) **Market conditions**

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;

- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(c) **Taxation**

The acquisition and disposal of Securities will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Securities from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Securities under this Prospectus.

(d) **Reliance on key personnel**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

(e) **Managing Growth**

The Company's success will depend on its ability to expand its operations. If the Company is unable to successfully manage the expansion of its business, its financial condition and results of operations could be materially adversely affected.

6.5 **Speculative investment**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the securities offered under this Prospectus.

Therefore, the Securities to be issued pursuant to this Prospectus (or Shares to be issued upon exercise of the new Options) carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities.

Potential investors should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.
